EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science

CGPA: **8.40/10**

Expected May 2027

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Programming: C++, Java, Python, JavaScript, Kotlin
Frontend: React.js, HTML, Tailwind CSS, Tkinter
Backend: Node.js, Express.js, MongoDB, MySQL, Firebase
Cloud: Vercel
Testing & Tools: Git

Internship Experience

Siemens Ltd.

Component Log Viewer Web Application

Web Developer Intern

May 2025 – June 2025

- Developed a full-stack web application using Python and Tkinter to automate and streamline product component inspection logs in electronics manufacturing, reducing manual inspection time by approximately 40%.
 - Designed an intuitive GUI for real-time log viewing, integrated SQLite for robust database management, and Pandas for data analysis of over 500 daily component records.
 - Implemented Pytesseract-based OCR to automatically extract text from component images, achieving 95% accuracy in testing and reducing human errors by 70%.
- Tech Stack:** Python, Tkinter, SQLite, Pandas, Pytesseract

Projects

Real-Time Driver Fatigue Detection System

July 2024 – Dec 2024

- Engineered a real-time computer vision system in Python using OpenCV and dlib to detect driver drowsiness by analyzing facial landmarks and eye blink patterns.
 - Achieved over 90% detection accuracy across 500+ test video frames, processing at 30 FPS and triggering Pygame audio alerts in under 0.5 seconds for prolonged eye closures.
 - Monitored eye aspect ratio (EAR) thresholds to identify fatigue indicators, enhancing road safety by providing timely warnings.
- Tech Stack:** Python, OpenCV, dlib, Pygame

Eco Footprint Tracker Mobile Application

Jan 2025 – April 2025

- Built a cross-platform Android app using Kotlin and Jetpack Compose to track and calculate users' daily carbon footprints based on inputs from transportation, food, water, and home energy consumption.
 - Provided personalized recommendations and visualizations that helped test users lower their estimated carbon emissions by 15-25% through actionable insights.
 - Integrated Room database with ViewModel for offline data persistence and smooth navigation across 10+ screens, including interactive quizzes and detailed reports.
- Tech Stack:** Kotlin, Jetpack Compose, Room Database, Navigation Component

ACHIEVEMENTS

- Solved **200+ DSA problems** across various coding platforms, including LeetCode, CodeChef, Codeforces, etc.
- Design Team Member, ELA:** Led visual design for 10+ campus events, increasing event engagement by **25%**.
